

### RING SIZE GUIDE

2 cm.

2 cm.

Print this page in the option: actual size.

If you don't see the option, print it at 100% in a Letter Size page.

Check that the square measures exactly 2x2 cm to make sure your print is in real size.

#### OPTION A:

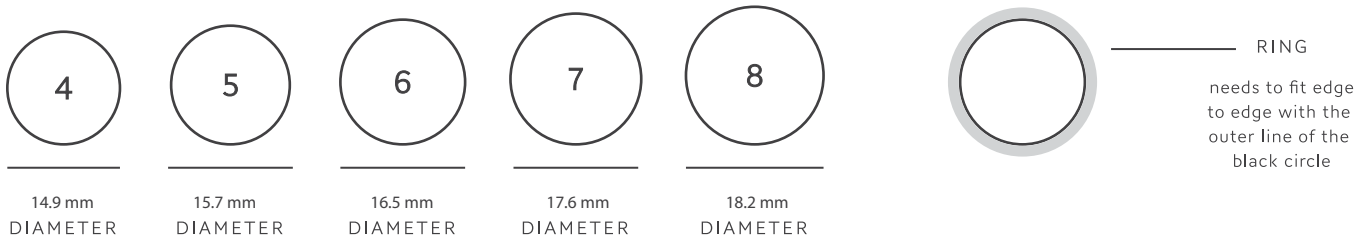

Choose a ring of your own that fits comfortably and place it over the three different circles below.

Make sure you measure it properly by following the instructions on the right.

When the circle and the inner part of the ring matches, you've found your best size.

If you're still unsure, you can find the exact diameter of our ring sizes below so you can measure your own ring and compare.

In case you still have doubts, we recommend you take the bigger one.

#### OPTION B:

Measure your finger by wrapping a measuring tape around it. Alternatively, use a piece of string, mark it and measure it with a ruler.

Match your measurement with the diameters above in [Option A](#) to get your best ring size.
